SUMMARY

Full stack Engineer with 4 years building production web applications across fintech, compliance, and security domains. Strong focus on scalable architecture, design patterns, and accessible UI. Proven track record shipping polished interfaces backed by clean, maintainable code. Experience spans AI-powered trading platforms, KYC onboarding systems, and zero-knowledge encrypted storage.

EXPERIENCE

Shuru Technologies *Remote, India*

Senior Product Engineer *July 2026 – Present*

- Built a **community platform for teachers** for a client, delivering a social feed with posts and threaded comments, teacher profiles, groups, and **role-based content moderation**.
- Implemented **in-app purchases for paid courses** and a **resource-sharing module with search and filters**, enabling teachers to monetize their content and discover learning materials.

uTrade Solutions *Punjab, India*

Senior Software Engineer *May 2024 – July 2026*

- Led frontend for **AI-powered, real-time interfaces** including multi-thread chat systems with streaming responses, in-app editors, and data-dense dashboards, serving **500+ active users**.
- Migrated a legacy Angular monolith to a **microfrontend architecture in a monorepo**, rebuilding the application in React with end-to-end type safety, orchestrated via pnpm workspaces and Turborepo for optimized builds and caching.
- Built event tracking schemas and integrated analytics tools (Mixpanel, Meta Pixel, Google Analytics) across products, surfacing engagement insights that informed activation flows and contributed to **1,000+ new signups** in a single quarter.
- Improved application **performance by ~40%** through code-splitting, lazy loading, and state-management optimization; **mentored 2 junior** engineers on review practices and component design.

uTrade Solutions *Punjab, India*

Software Engineer *July 2022 – May 2024*

- Owned full-stack application delivery on a **MERN-based admin platform** including REST APIs, MongoDB schemas, RBAC flows, and React UIs, collaborating directly with product and compliance teams.
- Refactored code duplication into reusable components, cutting bundle size by **35% (500 KB → 350 KB)** and measurably improving load times across products.
- Built **REST APIs in Node.js, Express, and TypeScript** with JWT auth, request validation, and clean modular routing. Followed **SOLID principles** and used established design patterns throughout

PROJECTS

Algo Trading Platform (uAlgos) — uTrade Solutions

- Built the **AI Trading Assistant** frontend — multi-thread chat-based strategy builder with **websocket-streamed responses** (markdown → HTML) and a **custom in-app IDE** for editing AI-generated strategy artifacts; **reduced strategy design time by ~40%**.
- Developed a **calendar-style heatmap** visualizing backtest outcomes (max profit/loss, win/loss streaks) alongside a detailed trade-level breakdown enabled back tests with over **85% accuracy**.

eKYC Multi-Vendor Platform — uTrade Solutions

- Engineered a **dashboard with RBAC** across **4 roles** (admin, agent, RM, affiliate), securing review and approval workflows for **10,000+ KYC submissions**
- Integrated external APIs and SDKs, automating document retrieval and e-sign processes, which reduced manual workload by **up to 60%** and accelerated **verification time by 30%.**

SKILLS

Languages: TypeScript, JavaScript, HTML5, CSS3
Frameworks & Libraries: Angular, React, Redux, Next.js, React-Native, Tailwind CSS
Backend & APIs: Node.js, Express, MongoDB, Postgresql, REST APIs, WebSocket
Architecture & Practices: OOPs, SOLID principles, Design Patterns, Responsive Design
Tools: Git, Github, Docker, CI/CD, Jenkins, AWS**,** Postman, JIRA, Firebase

EDUCATION

Panjab University *Chandigarh, India*

Bachelor of Engineering in **Computer Science** *2018 – 2022*
