VASU GARG

Senior Software Engineer · React · TypeScript · Angular

+91-9878208089 | vasugarg6656@gmail.com | linkedin.com/in/vasu-garg-07 | github.com/VasuGarg07 | Punjab, India

SUMMARY

Senior Software Engineer with 4 years of experience building high-performance, scalable web applications. Specializes in Javascript Frameworks and TypeScript with a strong focus on client-side architecture, component systems, and real-time API integration. Track record of delivering AI-backed features and measurable performance gains at fintech scale.

CORE COMPETENCIES

Frontend Architecture · Performance Optimization · Streaming UI Development · RESTful API Integration · Agile / Scrum · Web Accessibility (WCAG) · Code Reviews & Mentorship · State Management · Design Systems · Responsive UI/UX

PROFESSIONAL EXPERIENCE

uTrade Solutions | **Senior Software Engineer** May 2024 – Present · Punjab, India

- Architected the user interface layer for an AI-powered multi-purpose chat — designed **streaming responses**, **multi-threaded state**, and full component data flow modelled on modern LLM interfaces.
- Contributed to a **shared Angular component library** (Git submodule) used across two products, standardizing design patterns and eliminating cross-team code duplication.
- **Mentored 4 junior developers** through onboarding and feature work; enforced Git workflows and PR review standards across the team.

uTrade Solutions | **Software Engineer** July 2022 – April 2024 · Punjab, India

- Migrated internal tooling from **Angular to React**, significantly improving maintainability and aligning with the team's primary stack.
- Refactored duplicated Angular templates into reusable components, cutting **60%** template code size and decreasing bundle size from **400 KB to 260 KB**.
- Triaged and resolved bugs via JIRA; structured code review practices led to a **25%** reduction in open bug count quarter-over-quarter.

KEY PROJECTS

eKYC — Multi-Vendor KYC Platform — *uTrade Solutions*

- Developed a multi-vendor eKYC platform with **React, TypeScript, Tailwind CSS**, and Firebase Remote Config, enabling live updates without redeployment.
- Admin dashboard cut KYC processing time by **35%** and improved agent efficiency by **25%.** DigiLocker and Digio SDK integration cut **60%** manual workload.

Algo Trading Platform — uAlgos — *uTrade Solutions*

- Designed an LLM-driven strategy builder with backtesting and screening modules, increasing screening speed by **30%** and boosting user adoption by **25%**.

Encrypted Cloud Storage — Cove Drive — *uTrade Solutions*

- Engineered a zero-knowledge storage system using **AES** and **RSA** encryption; added password-protected sharing and in-app file preview, accelerating user retention by **25%**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks: React.js, Angular, Redux, Rxjs
Libraries: Tailwind CSS, Material UI
APIs & Tools: RESTful APIs, Firebase Hosting, Git, GitHub, JIRA, VS Code, Cursor
Practices: Agile/Scrum, Code Reviews, Web Performance

EDUCATION

Chandigarh College of Engineering and Technology 2018 – 2022 · Chandigarh, India

Bachelor of Engineering in Computer Science
