SUMMARY

Senior Software Engineer with 4 years of experience building high-performance, scalable web applications. Specializes in React.js and TypeScript with a strong focus on frontend architecture, component systems, and real-time API integration. Track record of delivering AI-powered features and measurable performance gains at fintech scale.

CORE COMPETENCIES

Frontend Architecture · Performance Optimization · Streaming UI Development · RESTful API Integration · Agile / Scrum · Web Accessibility (WCAG) · Code Reviews & Mentorship · State Management · Design Systems · Responsive UI/UX

PROFESSIONAL EXPERIENCE

uTrade Solutions | **Senior Software Engineer** May 2024 – Present · Punjab, India

- Architected the frontend for an AI-powered chat and strategy builder — designed **streaming responses**, **multi-threaded state**, and full component data flow modelled on modern LLM interfaces.
- Contributed to a **shared Angular component library** (Git submodule) used across two products, standardizing UI patterns and reducing cross-team code duplication.
- **Mentored junior developers** through onboarding and feature work; enforced Git workflows and PR review standards across the frontend team.

uTrade Solutions | **Software Engineer** July 2022 – April 2024 · Punjab, India

- Rewrote internal tooling from **Angular to React**, improving long-term maintainability and aligning with the team's primary stack.
- Refactored duplicated Angular templates into reusable components, cutting template code size by **60%** and reducing bundle size from **400 KB to 260 KB**.
- Triaged and resolved UI bugs via JIRA; structured code review practices contributed to a **25%** reduction in open bug count quarter-over-quarter.

KEY PROJECTS

eKYC — Multi-Vendor KYC Platform — *uTrade Solutions*

- Built a multi-vendor eKYC platform with **React, TypeScript, Tailwind CSS**, and Firebase Remote Config, enabling live UI updates without redeployment.
- Admin dashboard reduced KYC processing time by **35%** and improved agent efficiency by **25%**; DigiLocker and Digio SDK integration cut manual workload by **60%**.

Algo Trading Platform — uAlgos — *uTrade Solutions*

- Built an AI-powered strategy builder, backtesting system, and stock screener; delivered 6+ modules across a 20+ member team, improving screening speed by **30%** and user adoption by **25%**.

Encrypted Cloud Storage — Cove Drive — *uTrade Solutions*

- Engineered a zero-knowledge storage system using **AES** and **RSA** encryption; added password-protected sharing and in-app file preview, improving user retention by **25%**.

TECHNICAL SKILLS

Languages: JavaScript (ES6+), TypeScript, HTML5, CSS3
Frameworks: React.js, Angular, Redux, Rxjs
UI Libraries: Tailwind CSS, Material UI
APIs & Tools: RESTful APIs, Firebase Hosting, Git, GitHub, JIRA, VS Code, Cursor
Practices: Agile/Scrum, Code Reviews, Web Performance

EDUCATION

Chandigarh College of Engineering and Technology 2018 – 2022 · Chandigarh, India

Bachelor of Engineering in Computer Science
